Discover our tasty & healthy salad mixes

MicroFlavours

Sustainable vertical farm in Brussels.

MicroFlavours is an indoor vertical farm in the heart of Brussels. Meaning that we grow our healthy salads in different layers on top of eachother. With led-lights and climate controlling systems we're able to grow indoor all-year round. We grow sustainable using hydroponics which allows us to save 70% of our water consumption copared to traditional farming. All of our delicious salads are harvested and packed with love and social employment. Our deliveries are done with cargobikes in and around Brussels.
